I have an old IDE: Delphi, C++Builder version 4. I would like to use the debugger window, so I tried to install. However, at the time of installation of Delphi C++ Builder version 4, there was an error! "Error No. C4530: unknown prefix: 'T'" I searched Google, and can only find this site, which I found nothing. Help please! It has been a long time since I use Delphi, and I am rather sure that I can not fix this.
