When your computer is turned off, it's very easy to lose track of files, documents, and settings. This is the biggest problem that Windows has been facing, and it's been annoying us for so long. After many years of development, KeyMacro addresses this problem through technology and design. It provides an excellent way to search for and find the files that you want. KeyMacro Description: KeyMacro is a handy tool to help you quickly locate files, documents, and settings when your computer is turned off. All it takes is the folder you want to save. With

KeyMacro, you can locate a specific folder or file in a blink of an eye. Once you find it, you'll be able to access it at any time. All you need to do is hit the FIND button and enter the folder or file name, then hit OK. Searching is very simple. You can choose which file types you want to search through, whether it's a file, folder, registry key, or a part of the file, and you can also choose a specific type. With KeyMacro, there's no need to wait for your computer to start, and you can instantly search and locate the files that you want to use. Using KeyMacro is super easy. You can find the folder or file you want without being stuck in your computer for a long time.
