MujiTaskNote Full Product Key Free [2022-Latest]

- MujiTaskNote provides a menu-driven interface that allows to set tasks that should be written in different periods of the day. - There is a simple notification in the tray area when new tasks are added. - Bookmark the current task in the context menu. - The task automatically relaunches when a new task is added. - Save the list of used colors. - The colors of the menu labels can be changed. - Use a simple system font. - Support for High contrast mode. - Download from GitHub: - PazPowerSkin Pack compatibility. This is a fix for my original skin that was a modification to supereasy MujiSkin, to make it compatible with the new Rainmeter options panel. It does not require the supereasy MujiSkin. Update for the muji skin... 2.8.5 and 2.8.2 I have fixed a few problem with the UI of the task list. Now the textarea is at 80% of the resolution. Please report if you have troubles with this new version of the skin. Update for the muji skin... 2.8.4 I have added an extra filter for the task list... now you can add ALL of your tasks and get a report of the tasks that really should be written down. You can add also an extra filter on the color to display only what you want... I have added a nice solution to help you export your tasks lists. You can now easily export all of your task lists or just 1 task list, in the following formats: \*.txt \*.csv \*.csv.txt \*.txt.csv I added also a solution to highlight the current selected task in the task list. Update for the muji skin... 2.8.3 I have added a second filter (the empty task list filter) for the task list. It can be useful to display the list of tasks that you don't have. I have added also a second task list that make easier to compare two task lists. A small patch to allow more characters in the task description. The limit is now 300 characters. I have found a bug in the task list when the task description contained 2 tasks with the same text... They are displayed 2 times with the same status...
