It includes a step-by-step procedure for accessing the control panel, viewing available options, and determining which options you may want to change. Contents Update: You can also change default settings in File Explorer and the File Tab of the Control Panel. Why Change Folder Options? The default settings in Windows allow users to organize and view a specific folder in a variety of ways. For example, you can make the list of files shown in the left pane of File Explorer be based on file extensions instead of file names. You can also change the behavior of the left pane so that it displays icons, instead of text. How to Access Folder Options There are a few ways to access the Folder Options control panel. If you click the File menu in File Explorer, you'll see an option called "View" that opens a control panel similar to the one shown here: Click the link to open the Folder Options control panel. Folder Options in Windows 7 To make basic changes to folder options in Windows 7, you'll need to open the control panel via the link in Step 1. From the left pane of the Folder Options control panel, click the General item to open the Settings dialog. You can adjust the way you want to view files and folders
