System Requirements For Send SMS Yahoo Widget:

Be aware that this game was only made for Mac/Windows, and can be played with any computer which can run either of those operating systems. It also runs on Linux, but unfortunately it is not yet available for download (July 2019). "Not only did Google Mapmaker only make the Mac and Windows versions of the game, but it was also a very early version of the game that only allows you to place and edit street names. The engine is pre-developed and the design of the game is also not finished. This is a beta
