Manga is one of the most popular genres of entertainment today. Manga as a word itself means "to draw". For the most part, manga are comic books with various stories, with each being serialized into chapters, just like a novel. Manga has been around since the early 1900s, but it has only just recently risen in popularity and awareness. Right now, you can find manga everywhere - from bookstores to manga cafes. While manga as a genre has been around for quite some time, recent events such as anime series "Attack on Titan" and the release of the recent "No Game No Life" manga has helped the genre soar in popularity and spurred more new releases. Manga are published in very different ways. Some publishers, such as Shueisha, publish individual volumes of manga at a time. A few others, such as Viz, publish manga on a weekly or even monthly basis. Some publishers even run a manga series across multiple volumes. Manga are also published in different ways. Each publisher has their own way of doing things. Shueisha (one of the largest publishers of manga) publishes manga on V-Man, which is like a digital comic book and website. Asuka Publications, a publisher in South Korea, publishes their manga on their own website. Viz Media (one of the largest publishers in North America) publishes their manga on their own website.
