Dynamic Player Abilities FIFA 22 captures the beautiful, dynamic movement in real-life and adds it to the game. Dynamic Player Abilities (DPA) allow you to choose from 53 unique behaviours for each of your team's players. From sprinting to jogging, DPA responds to the action on the pitch, helping players feel more like a real football star. FIFA 22 introduces and upgrades Player Impact Engine (PIE), the new engine designed to deliver more realistic player movement and actions. PIE predicts and adapts player behaviour before and during a game to deliver the best playing experience possible. 50-Metre Runs and the Caretaker Player FIFA 22 introduces a new range of 50-Metre Runs, which see a player confidently perform a sprint

from a standing start with a 50-Metre acceleration. Players running from a standing start are now able to move at 3.0 seconds per Metre. FIFA 22 introduces the all-new Caretaker Player. When you're down a man and your goalkeeper is injured, drop the goalkeeper from the field and let a player at the back play in goal. The player assigned to "cope with" the goalkeeper is automatically replaced as the next man up. Freekick Shot Animation FIFA 22 introduces a new Freekick Shot Animation which more precisely replicates the way the ball travels when kicked from a free position in the penalty area. The ball travels more realistically in all directions and with a dynamic trajectory, making the most realistic kick look even more amazing. New Offside Pushback Simulation FIFA 22 features a new Offside Pushback Simulation. To create a "more responsive offside line," FIFA developers have reworked the way

offside pushes are detected. This new system takes into account “various perspectives” when attempting to determine if a team has infringed offside. New Elite and Pro Player Traits FIFA 22 introduces new Elite and Pro Player Traits to make your favourite players even more enjoyable to play. Elite Traits are unlocked as your player progresses throughout the game, and Pro Traits are locked in for when you purchase the player. New Goalkeeping Animation FIFA 22 introduces a new goalkeeping animation which showcases new motion capture techniques. The goalkeeping animation uses new tools to capture the goalkeeper’s movements in full flight, including the goalkeeper
